How I Operate as a Product Owner

Strategy Alignment

- Translate business goals into measurable outcomes
- Define North Star metric & KPI framework
- Align roadmap to quarterly objectives

Backlog Ownership

- Prioritize using RICE / MoSCoW frameworks
- Write structured user stories with acceptance criteria
- Decompose initiatives into sprint-ready tasks

Sprint Execution

- Lead planning & backlog refinement sessions
- Clarify scope before development begins
- Protect sprint focus & manage trade-offs

Data-Driven Decisions

- Monitor funnel & performance KPIs
- Identify drop-offs & optimization opportunities
- Convert insights into backlog priorities

Continuous Optimization

- Run A/B experiments & performance tests
- Iterate based on real usage data
- Scale successful features, sunset low-impact work
